PROFESSIONAL SUMMARY

Passionate Frontend Developer with a strong foundation in modern web technologies. Dedicated to translating complex designs into clean, performant, and interactive user experiences that make an impact. Focuses on writing modular, reusable code, cross-device responsiveness, and bridging the gap between aesthetics and functionality.

TECHNICAL SKILLS

React JS, JavaScript (ES6+), HTML5, CSS3, Node.js, Express, MySQL, Git, GitHub

FEATURED PROJECTS

1. JK Electrical Website

A high-performance commercial website for an electrical services vendor. Built with React, CSS Grid, and Node.js. Features service listings, booking, and reviews.

2. Student Management System

An administrative system for record-keeping. Built with React, Express, and MySQL. Features student filtering, attendance tracking, and synchronization.

3. Portfolio Website

A modern, responsive developer portfolio. Built with React, Vite, and CSS3. Features vibrant styles, custom hooks for scroll animations, and clean interactive elements.

EDUCATION

Bachelor of Computer Science / Engineering Information Technology
